SUMMARY

Final-year Computer Science student (CGPA 3.93/4.00, graduating Feb 2027) and full-stack engineer who takes software from idea to production: a paid accounting system that replaced a rice mill's paper registers, a campus notice platform with 400+ users, and now a campus plate-recognition system.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, C#, C++, SQL
Frontend:	React.js, Electron, Tailwind CSS, HTML5, CSS3, Chrome Extensions, PWA
Backend:	Node.js, Express.js, ASP.NET Core, FastAPI, REST APIs, JWT, OAuth
Databases:	PostgreSQL, SQLite, MongoDB, MySQL
DevOps:	Git, GitHub Actions (CI/CD), Docker, Linux, Oracle Cloud, Vitest

EXPERIENCE

Freelance Software Engineer | Abdullah Rice Mills Feb 2026 – Jun 2026

- Solo-built an offline Electron/React/SQLite accounting system replacing the mill's paper registers.
- Cut settling a customer's account from 30+ minutes to a few clicks across hundreds of accounts.
- Stored money as integer paisa, added a hash-chained audit trail, and shipped with 200+ tests.
- Delivered as a paid Urdu/English system, now in maintenance; other mills have shown interest.

Founder and Developer | UCP NoticeBoard (Independent) Jul 2026 – Oct 2026

- Built a Chrome extension and web app that now carries almost all UCP notices to 400+ users.
- Cut publishing from 3–4 minutes to under a minute for 5 publishers with on-device screenshot OCR.
- Moved the ASP.NET Core backend from $5/month to a free Oracle Cloud VM with zero data loss.

Technical Lead | Takhleeq, University of Central Punjab Aug 2026 – Present

- Lead a 2-member team building ANPR to replace manual logs of about 5,000 vehicles at 3 campus gates.
- Built the YOLO detection, tracking, and PaddleOCR stages; designed the FastAPI/PostgreSQL backend.

Teaching Assistant | University of Central Punjab Oct 2024 – Feb 2025; Oct 2026 – Present

- Mentored 20+ OOP (C++) students, all of whom passed; now assist 40+ students in Intro to Computing.

PROJECTS

AgriVision | *MERN, Python, TensorFlow, Docker* Final Year Project

- Leading the backend of a MERN app with a containerized Python model service and 3 role dashboards.
- Fusing daily MODIS and 10 m Sentinel-2 imagery to map crop health for Sahiwal, Punjab on cloudy dates.
- Evaluating the fusion model against classical baselines on 4 metrics: RMSE, R^2, SSIM, and PSNR.

Opportunity Inbox Copilot | *React, Express, MongoDB, OpenAI API, Gmail API* GitHub

- Led a 3-member SOFTEC 2026 team turning Gmail, pasted, and PDF emails into ranked opportunities.
- Used GPT-4o-mini only to extract 5 opportunity types; ranked them on fit, urgency, and completeness.

AI Support Bot and Risk Predictor | *RAG, FAISS, scikit-learn* Enablers AI Hackathon, 1st Place

- Won 1st place with a 3-member team by building 2 working AI prototypes in 3 hours.
- Built a support bot with zero-shot intent routing and RAG over FAISS that escalates unsure answers.

EDUCATION

Bachelor of Science in Computer Science Mar 2023 – Feb 2027 (Expected)
University of Central Punjab, Lahore | CGPA: **3.93 / 4.00** | 100% Merit-Based Scholarship

ACHIEVEMENTS & LEADERSHIP

- **Hackathons:** 1st at Techathon 2.0, Enablers AI, CodeFest (FCCU); 2nd at LoopVerse 3.0, Web-a-thon.
- **Research:** Co-authored a PKR 1 million IGRP-funded remote-sensing research proposal at UCP.
- **Leadership:** Former Hackathon Director, IEEE CS UCP; Marketing Director, Hult Prize UCP.

CERTIFICATIONS

Google Cloud: Generative AI Leader Professional Certificate | **Anthropic:** Claude Code in Action
Packt: MERN Stack Front To Back Specialization; Advanced Frontend Development and Deployment
Packt: Backend Development and API Creation | **Anthropic:** Model Context Protocol: Advanced Topics
